2 RECYCLING YOUR FOOD WASTE IS EASY

The best thing that can happen to food is for it to be eaten. But for anything you can't eat, like peelings, bones, plate scrapings and tea bags, the best thing to do is recycle them.

Why recycle food waste?

When you place food waste in your black bag it is taken to landfill where it rots and releases greenhouse gases that harm the environment.

By recycling food waste it can be turned into energy to power homes and compost to grow food.

How can I recycle my food waste?

STEP 1

Get the right equipment – you will need a kitchen caddy, caddy liners and a kerbside caddy. Contact us if you need any of these items, see contact details on next page.

STEP 2

Line your kitchen caddy with the liner.

STEP 3

Place any food waste into the caddy, taking care to exclude any packaging.

STEP 4

When your kitchen caddy is full, empty into your kerbside caddy and put out for collection once a week so it can be recycled.

IT'S EASY

CONTAINS FOOD SMELLS

CADDIES LOCK TO STOP PESTS GETTING ACCESS

IT'S COLLECTED ONCE A WEEK

TURNED INTO ELECTRICITY

3

WHAT HAPPENS TO MY FOOD WASTE AFTER IT'S BEEN COLLECTED?

Your food waste is taken for treatment to an Anaerobic Digestion plant where it's turned into compost. The process also produces electricity that can be used to power homes and businesses in your area.
